Abstract:

Insoul-T Therapy like a proton therapy but proton therapy is more sideeffective and damage body tissue

But insoul therapy based on photons with special frequency and waive length which is able to send singnal to brain and and valance chemical pro-cesor in body specially effective dopamine,

And neurotransmitter and receiver of nerves sys-tem

Its creats frequency passing through neurotrans-mitter and specially increase GABA(Gamma-Amino butric acid

When GABA is in form then metabolic disorder glucoselavel is in balace according to the neurons ratio of format;Adnin,guenin

Betta cell getting good work accoding formation of body cells processor

This therapy takes time according to glucose lable in human body and how is extra which burns as ketons of bodies

Insoul-T emmits signal with special frequency to the brain and body tissue

Which helps to chemical valance in body according ratio of energy in body

Figure 2: Its the Equipment which is a photo-electronic device name is Insoul-T

Its Emmits Signal with required frequency for treatment as proccesor of chemical reaction in body

Reffrence

Basics of biology

Neurology,

Electronics and Quntum theory,

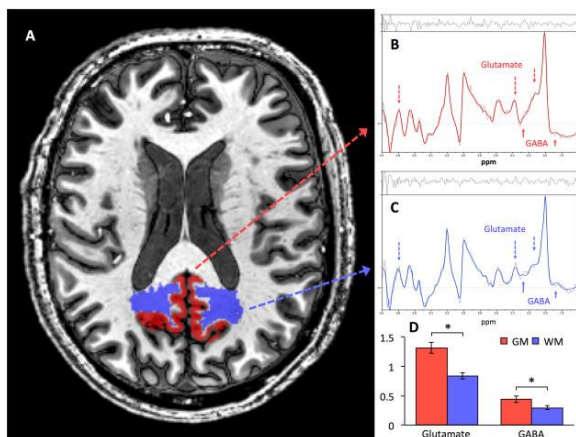

Figure 1: Figure showing GABA lable ,how its increase for protecting cell and signal to neuro-transmitters

And due to therapy day by day its increase and goes strong immunity

And its remove Diebetese mellitus,Heart diseese and Insomaniya
